

Automobile et Touring Club du Liban

1- The use of expired homologation "RAIN" **tires** during the next Spring Rally.

DECISION: An exception was granted for the past three years, but for this year the expired homologation tires will not be allowed.

2- **Seats** with expired homologation.

DECISION: All seats should be homologated for the 2018 season.

3- **FIA fuel tanks:** For the 2018 season, all original fuel tanks will be accepted for the national events, except for cars which are homologated with FIA safety tanks such as R5 or other R group cars which should have valid homologated fuel cells.

For the rally of Lebanon, the FIA regulations will prevail.

4- **Mounted Extinguishing systems:** The maintenance refill & service of these systems (every 2 years) should be performed by the manufacturer of the system or by any other company approved officially by the same manufacturer.
